

Knopflerfish Pro - Certified OSGi Technology

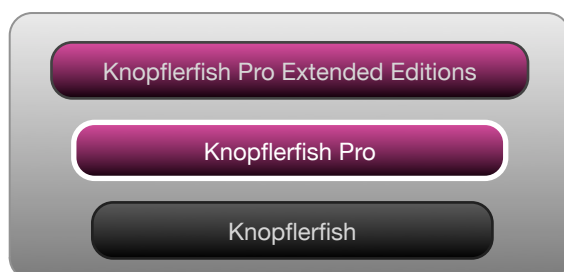

Knopflerfish Pro was the first OSGi Service Platform to be certified OSGi Release 4, version 4.2 compliant. By implementing OSGi release 4, version 4.2 we continue our commitment to develop and distribute Knopflerfish Pro - probably the best OSGi platform in the world.

Commercial Open Source

Knopflerfish Pro is the commercial versions of the Knopflerfish distribution. Knopflerfish Pro is a fully supported product, intended for professional use. Knopflerfish Pro gives companies the assurance required to use open source software in commercial systems.

Knopflerfish Pro

Knopflerfish Pro is based on open source Knopflerfish OSGi and includes all bundles and tools, including full source core, from Knopflerfish. What Knopflerfish Pro adds is the OSGi Certification and the unique components only available in Knopflerfish Pro, making Knopflerfish Pro a complete implementation of the OSGi Release 4, version 4.2 specifications.

Certified OSGi R4, v4.2 compliant

Knopflerfish Pro is certified to be OSGi Release 4, version 4.2 compliant. Embedding Knopflerfish Pro in your product grants you the right to clam - "Contains an OSGi Compliant Service Platform".

Knopflerfish Pro Components

Knopflerfish Pro includes a set of unique components only available in Knopflerfish Pro, making Knopflerfish Pro a complete implementation of the OSGi Release 4,

version 4.2 specifications. This includes the OSGi defined UPnP services as well as the residential and mobile management services, e.g. DMT Admin.

OSGi Defined UPnP Services

UPnP Control Point	UPnP Control Point bundle
UPnP Device	UPnP Device bundle

OSGi Residential & Mobile Management Services
